Relevant Experience

Software Developer • Selco Enterprises (formerly Webenetic)

May 2023 - Present

- Developed, maintained, and shipped production code for our CRM application primarily using Typescript, NextJs, React Query, NodeJs, and SQL.
- Proposed and implemented scalable solutions to address server issues during data fetching.
- Engineered and improved major features of our legacy CRM application through code refactoring, query optimization, and OWASP principles.
- Collaborated with designers and engineers to ensure thoughtful and consistent user experiences across the applications.

Projects

Knowly Tutorials

- Built and shipped, a custom website to enhance the online presence of a coaching institute serving national and international students.
- Used Tally forms to make information collection easier and keep everything organized in one place.

GPA Calculate

- Built an application that serves over 60,000 students (and is growing), simplifying their GPA calculations effortlessly.
- Implemented SEO best practices to improve Google search rankings.

With sam

- Built a highly interactive and visually appealing website for a social media creator to showcase his content and connect with his audience.
- We performed rigorous testing and debugging to ensure all the services and webhooks were up to the mark.

Asahi Ramen

- Contributed extensively to the design and development process to ensure the website enhanced the ramen house's brand identity.
- Communicated closely with the clients throughout the process to ensure satisfaction and make revisions.
